

Aims and Objectives

1. To provide physics-related learning experiences for students to develop scientific literacy.
2. To prepare students for further studies or careers in fields related to physics.
3. To prepare students to become lifelong learners in science and technology.
4. To develop and possess students' positive values and attitudes such as curiosity, honesty, respect for evidence, perseverance and tolerance of uncertainty through the study of physics.
5. To uphold and pass on the core values of catholic education to students.
6. To implement national security education to help students learn about the conditions of our country.
